

Evian, agua natural de manantial – Informe anual de la calidad del agua

En Evian estamos orgullosos de nuestros productos. Evian, agua natural de manantial, es distribuida en toda la nación y alcanza o excede todos los estándares de calidad y seguridad impuestos por el gobierno federal y estatal. La *Administración de Drogas y Alimentos de los Estados Unidos (FDA)* regula la comida y el agua. Nuestros científicos, así como también entidades independientes (laboratorios certificados) testean de forma extensiva el agua de la fuente y también el producto terminado para asegurar que el producto exceda o alcance las normas federales y estatales del agua embotellada.

Además de los estrictos estándares regulatorios, la asociación internacional del agua embotellada (IBWA) mantiene un riguroso código de calidad para sus miembros. Evian es miembro de IBWA y alcanza o excede los requisitos del código de IBWA. Así mismo nos orgullese saber que nuestra planta es inspeccionada anualmente sin aviso previo, por un agente de NSF internacional (NSF). Basándose en estas inspecciones sin aviso previo y en análisis realizados en el producto terminado, NSF certifica que Evian, agua natural de manantial, cumple con las regulaciones federales y estatales y también con el código de IBWA. NSF está ubicado en Ann Arbor, Michigan. Para más información acerca del IBWA o NSF, por favor visite sus páginas de Internet <http://www.bottledwater.org> y <http://www.nsf.org> o llame a IBWA al 1-800-WATER-11 o a NSF al 1-800-673-6275.

Evian, Agua Natural de Manantial

Evian, agua natural de manantial, empieza su jornada como lluvia y nieve en la cima de los alpes franceses. Lleva al menos 15 años para cada gota de evian sea filtrada a través de las formaciones de arena glacial de los alpes franceses. Es también en esta jornada que Evian adquiere sus cualidades únicas, el equilibrio en su composición mineral. La composición mineral de Evian ha siempre sido única desde sus inicios. En 1807, Evian fue analizada por primera vez y desde entonces su singular composición mineral es testimonio de su calidad.

Embotellamiento de Evian, Agua Natural de Manantial

Evian, agua natural de manantial es exclusivamente embotellada en su fuente (Manantial Cachat), la cual yace en la base de los alpes franceses, lejos de todo desarrollo urbano o industrial. El manantial Cachat esta claramente indicado en las etiquetas de las botellas del agua Evian. La fuente del agua Manantial Cachat, es aprobada por varias agencias regulatorias que basan sus aprobaciones en revisiones extensivas y bien detalladas. La alta calidad de Evian, tanto en la fuente, como en el producto embotellado es controlada por pruebas analíticas. Estas pruebas comprueban que el agua no está de ninguna forma contaminada. Varios cientos de pruebas se realizan a diario en la fuente antes de que el agua sea embotellada y en el producto terminado para verificar que la composición mineral sea constante, la ausencia de contaminación y la calidad de las botellas de plástico. La tubería de acero inoxidable que sale a partir de la fuente va directamente a la planta. La planta y su equipo están diseñados para proteger la pureza de Evian, además de los equipos automatizados de embotellado que se mantienen bajo estrictas condiciones sanitarias.

Datos sobre la calidad del agua

Se adjunta una copia de nuestras más reciente pruebas de calidad del agua realizadas por el laboratorio certificado independiente, NSF. Los Informe de NSF listan los resultados de las pruebas de calidad del agua, más de 175 sustancias, incluyendo productos inorgánicos (metales, minerales, etc.), orgánicos (plaguicidas, herbicidas, etc.) y microbianos así como también parámetros físicos. Evian, Agua de natural manantial, testea tanto las substancias reguladas, como las substancias no reguladas. El presente informe contiene la sustancia analizada, los métodos de ensayo utilizados aprobados, los resultados de las pruebas, los límites mínimos de detección, las unidades de medición, la fecha y las normas de Calidad para el agua embotellada impuestas por la FDA. Las normas de calidad impuestas por FDA determinan los niveles máximos permisibles de más de 80 sustancias en el agua embotellada.

Evian, Agua Natural de manantial, se encuentra en pleno cumplimiento de todas leyes federal, estatales y de la industria del agua embotellada.

Para obtener más información acerca de Evian Agua natural de manantial, llame al 1-800-633-3363 o escríbanos a Evian Consumer Care, PO Box 1625, Horsham, PA 19044

Test descriptions preceded by an asterisk "*" indicate that testing has been performed per NSF International requirements but is not within its scope of accreditation.

Unless otherwise indicated, method uncertainties are not applied in any determinations of conformity. Testing utilizes the requested sections of any referenced standards, which may not be the entire standard.

The reported result for Odor, Phenolics, Potassium, Molybdenum, Silica, Total Phosphorus, Specific Conductance, Radon, Sr-89/90, Total Residual Chlorine, and Perfluorinated Compounds, if performed, cannot be used for compliance purposes within the State of Arizona.

The reported results for Asbestos, Phenolics, pH, Chlorine Dioxide, Chloramines, Total Residual Chlorine and Perfluorinated Compounds, if performed, are not covered by New York State certification.

Notes:

- 1) Bottled water sold in the United States shall not contain Fluoride in excess of the levels published by the USFDA in 21 CFR Part 165.110. These levels are based on the annual average of maximum daily air temperatures at the location where the bottled water is sold at retail. Please refer to the most current edition of the regulation to determine the Fluoride maximum level that pertains to your product.
- 2) A blank on the FDA SOQ column indicates that no maximum level has been established by the FDA for that contaminant.
- 3) An ND result means that the contaminant was not detected at or above the reporting limit.

For a list of NSF International Method Detection Limits refer to http://www.nsf.org/media/enews/documents/minimum_detection_level_spreadsheet.pdf.
